Music, technology and storytelling on the same wavelength.

Thyr-o-Heat is the musical identity of Thierry Delattre, a Belgian-Luxembourgish creative working at the crossroads of technology, fiction and club culture. His productions move between melodic house, electro and cinematic electronic music, with a particular focus on atmosphere, storytelling and memorable hooks.

His professional career in enterprise IT directly feeds a creative universe where software, artificial intelligence and human emotion meet. This crossover became the foundation of **GLITCHTY KAOS**: a near-future techno-thriller, an electro companion LP and a digital character designed to exist beyond the book.

Rather than adding a soundtrack afterwards, **Thyr-o-Heat develops the music as part of the story**. Tracks, scenes and characters belong to the same universe: the music releases become almost additional chapters, connected to the novel, streaming platforms and digital media.

The musical language

Beyond the Pages extends the world of the novel GLITCHTY KAOS through music. The tracks connect to moods, scenes and narrative shifts, so the album is more than an illustrative soundtrack. Its sound moves from melodic momentum to darker club tension while retaining a shared digital, cinematic identity.

WHY THE STORY IS DIFFERENT

One creator, three disciplines.

Music production, fiction and first-hand technology experience converge in one project.

An AI with a musical identity.

Glitchty Kaos is both a fictional character and a credited creative presence in the musical universe.

Transmedia by design from the start.

The book, tracks, visuals and website are designed to reinforce one another, rather than function as separate promotional products.
